

write a script to automate this process from the session directly

```
from bs4 import BeautifulSoup

import requests

import hashlib

URL = "http://94.237.55.157:44607/"

request = requests.session()

page = request.get(URL)

soup = BeautifulSoup(page.text, "html.parser")

for i in soup.findAll('h3'):

    md5 = (i.get_text())

    #print(md5)

    hash_object = hashlib.md5(md5.encode())

    md5_hash = hash_object.hexdigest()

    #print(md5_hash)

    data = {'hash': md5_hash}

    output = request.post(url = URL, data = data)

    print(output.text)
```
